PROFESSIONAL SUMMARY

Third-year Information Technology undergraduate at the University of Moratuwa building full-stack and backend applications with Java, Spring Boot, Next.js, React and TypeScript. Experienced in developing REST APIs, implementing JWT-based authentication and role-based authorization, and working with relational databases including PostgreSQL and MySQL. Currently leading a 10-member team on a microservices-based courier platform. Seeking a Software Engineering internship to build real-world software alongside an experienced engineering team.

EDUCATION

B.Sc. (Hons) in Information Technology 2024 – 2028 (Expected)
University of Moratuwa, Faculty of Information Technology

G.C.E. Advanced Level & Ordinary Level 2012 – 2020
St. Aloysius' College, Ratnapura

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, PHP, C, Embedded C

Frontend Development: Next.js (App Router), React, HTML, CSS, Tailwind CSS, shadcn/ui, React Hook Form, Zod, Zustand

Backend Development: Spring Boot, REST APIs, Microservices, API Gateway, JWT, OAuth 2.0, RabbitMQ

Databases: PostgreSQL, MySQL, SQLite

DevOps and Infrastructure: Docker, Docker Compose, GitHub Actions (CI), Linux, DigitalOcean, web server hosting

Development Tools: Git, GitHub, Postman, Figma; Agile development, pull-request code review

PROJECTS

SwiftDrop – Parcel Delivery & Courier Management System Ongoing
Team Lead · Group project, 10 members

Microservices-based courier platform for island-wide parcel delivery, built as eight microservices behind an API gateway. Supports customer bookings, merchant order integration, courier status updates, dispatcher assignment and real-time parcel tracking.

- Lead a 10-member team across eight microservices and an API gateway; assign service ownership to team members and review pull requests

Completed

- Built signup, login and JWT issuance in the identity service, with role-based tokens supporting authorization for five user roles

In development

- Integrating Google OAuth 2.0 login that resolves or creates the customer account and issues the platform's standard JWT
- Building the API gateway: service routing, JWT verification at the edge, role propagation to downstream services and support for long-lived streaming connections
- Implementing a public tracking endpoint and mobile-responsive tracking page that expose parcel status history without revealing personal data
- Setting up Docker Compose deployment for all services, PostgreSQL and RabbitMQ, with GitHub Actions CI and test coverage reporting

Tech: React, Java, Spring Boot, REST APIs, Microservices, API Gateway, PostgreSQL, RabbitMQ, JWT, OAuth 2.0, Docker, Docker Compose, GitHub Actions

Repository: github.com/amila-pathum/swiftdrop

MemberConnect – Member Registration System for ERP Integration

Group project, 5 developers

Secure web-based system that digitalizes member registration and administrative processes for an educational-sector financial cooperative, covering registrations, profile changes, transfers, terminations, scholarships, death and donation requests, approvals and document generation.

- Built the member termination workflow end to end, from request submission through approval to the final member record update
- Implemented the death and donation request workflow, including the process for recording a member's death
- Developed the dormant member process that governs how inactive members are flagged and handled
- Collaborated with four developers through a shared Git/GitHub branching strategy and pull-request code review process

Tech: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, React Hook Form, Zod, Zustand, Java 21, Spring Boot, REST APIs, PostgreSQL

Repository: MemberConnect Frontend | MemberConnect Backend

Task Management Application

Group project · Task views for upcoming, current and completed tasks, with user profile and settings management.

- Developed the user profile and settings module, including the forms and state handling behind it
- Built reusable React components in TypeScript within the Next.js App Router structure

Tech: Next.js (App Router), React, TypeScript, Java

Repository: github.com/amila-pathum/TodoNew

Grand Restaurant Management System

Group project · Menu management, online ordering, table reservations, customer reviews and an admin dashboard.

- Implemented the customer review feature, covering review submission, storage and display
- Built the authentication flow, including user login, logout and session handling

Tech: PHP, JavaScript, HTML, CSS, SQLite (PDO with prepared statements), password hashing

Repository: github.com/amila-pathum/restuarent

EXPERIENCE

Web Development Trainee – Revoise, Yakkala, Sri Lanka Oct 2023 – Jan 2024

- Developed and styled websites using HTML, CSS, JavaScript, PHP and MySQL as part of a structured training programme
- Worked in a Linux development environment, using command-line tools for day-to-day development tasks
- Deployed and hosted completed websites on Linux servers running on DigitalOcean

LEADERSHIP & ACTIVITIES

Corporal – National Cadet Corps (NCC), Western Cadet Band

- Held a non-commissioned rank with responsibility for junior cadets during training and official events
- Built discipline, teamwork and coordination through structured training and public performances

Organizing Committee Member – Gamers' Arena 2025, University of Moratuwa

- Supported event planning, registration and on-site operations for a university-wide arcade event
- Coordinated with the technical and logistics teams to deliver a smooth participant experience
